### DETAILED ACTION

1. Acknowledgement is made of the amendment received on July 23, 2007.

### EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Steven Capella on August 29, 2007.

The application has been amended as follows:

***Allowable Subject Matter***

3. Claims 1-14 are allowed.

4. The following is an examiner's statement of reasons for allowance: The present invention comprises a drift compensation system for adjusting the phase shift between sampling clock and the data clock. The closest prior art, (Bonaccio et al. US 2004/0264619) shows a similar system which also includes two different phase adjusting circuits and a control signal for controlling the oscillator based on the phase adjustment signal. However, Bonaccio fails to disclose the first phase adjustment/alignment circuit is tuned up/down based on the control signal, and when the first circuit is tuned (tune done), the second phase adjustment/alignment circuit starts operating, also for every phase adjustment/alignment operation the number of steps necessary for adjustment are calculated and compared to generate the tune

up/down control signal as claimed. The distinct features have been added to the independent claims 1, and 5. Therefore, rendering them allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
